

Sunbeam

K-SERIES INTEGRAL DG SETS

SERIES K

BENEFIT FROM THE INTEGRAL TYPE CANOPY!!

Now, as a delighted user, you get to enjoy the complete benefit of going for an integral-type canopy which clearly scores over the conventional cap-on type in virtually every facet of utility.

S. NO.	INTEGRAL	CAP-ON
01.	Fully-assembled, ready-to-use canopy	Canopy has to be assembled at site
02.	Built-in engine instrumentation panel and power panel ensure ease of operation	Operation of engine with built-in instrumentation panel but externally-mounted power panel
03.	One-shot, single-vehicle transportation of the canopied DG ensures low inward freight cost	Higher inward freight cost due to separate transportation of the DG set and the canopy
04.	Point-to-point shifting made easy	Shifting of Canopy and DG set is critical
05.	Minimal Installation charges	Installation charges greater as compared to integral type
06.	Occupies less space	Greater space required
07.	Built-in oil & fuel tanks eliminate theft and external damage as filling point is situated within the canopy with extended port	Oil filling is internal while fuel tank has to be placed outside the canopy with interconnections likely to result in theft and external damage
08.	No additional hoods above the canopy for hot air outlet and fresh air inlet	Provision for hoods for hot air outlet and fresh air inlet increases the height of canopy
09.	Easy to mount on structures	Structural installation is complicated

SPECIFICATIONS

Genset Model	Engine Model	Prime power Genset rating kVA / kW	Overall Canopy dimensions (mm)			Approx. Weight (kg.) with canopy
			Length	Width	Height
